

3.3-10mm Auto Iris CS Megapixel IR corrective 1/2.5 inch Lens

This quality Megapixel grade DC drive auto- Iris lens give a wide 3.3mm through to a zoom 10mm view. It features IR correction for precise focusing in the day and at night. It is designed for use C & CS lens mounting box cameras with 1/4, 1/3 & 1/2.5 inch CCD or CMOS cameras with DC drive output. It has a strong metal construction and all glass elements. It is suitable for use with any C or CS mount cameras with resolutions up to 5 megapixels

- 3.3-10mm vari-focal DC Drive 1/2.5 inch lens
- Megapixel grade lenses are precision ground to the edges of elements
- IR correction for precise focusing in the day and at night
- All glass elements and metal housing for harsh-temperature environment
- For use with C & CS lens mounting box cameras with 1/4, 1/3 & 1/2.5 inch CCD or CMOS sensors
- Suitable for cameras with all resolution image sensors up to 5 megapixel
- Suitable for Analogue, HD-SDI, and Megapixel IP cameras up to 5 megapixels resolution

Model No.	M125VD3310IR
Image Size (inch)	1/2.5 inch
Focal Length (mm)	3.3 – 10mm
Max. Aperture Ratio	1:1.4
Mount	CS
Horizontal Angle of View (°) (1/2.5" CCD)	93.5 – 39 degree
Horizontal Angle of View (°) (1/3" CCD)	76 – 31 degree
Back Focal Length (mm)	6.49 - 11.73mm
Dimensions (Diameter x Length x Width)mm	39 x 33.8 x 45.5mm
Auto Iris Operation	DC
Weight (g)	75g
