

12-40mm Auto Iris CS Megapixel IR corrective ½ inch Lens

This quality Megapixel grade DC drive auto- Iris lens give a 12mm through to a zoom 40mm view. It features IR correction for precise focusing in the day and at night. It is designed for use C & CS lens mounting box cameras with 1/4, 1/3, 1/2.5 & 1/2 inch CCD or CMOS cameras with DC drive output. It has a strong metal construction and all glass elements. It is suitable for use with any C or CS mount cameras with resolutions up to 5 megapixels

- 12-40mm vari-focal DC Drive 1/2 inch lens
- Megapixel grade lenses are precision ground to the edges of elements
- IR correction for precise focusing in the day and at night
- All glass elements and metal housing for harsh-temperature environment
- For use with C & CS lens mounting box cameras with 1/4, 1/3, 1/2.5 & 1/2 inch CCD or CMOS sensors
- Suitable for cameras with all resolution image sensors up to 5 megapixel
- Suitable for Analogue, HD-SDI, and Megapixel IP cameras up to 5 megapixels resolution

Model No.	M12VD1240IR
Image Size (inch)	½ inch
Focal Length (mm)	12 – 40mm
Max. Aperture Ratio	1:1.8
Mount	CS
Horizontal Angle of View (1/2" CCD)	34 – 12 degrees
Horizontal Angle of View (1/2.5" CCD)	26.5 – 9 degrees
Horizontal Angle of View (1/3" CCD)	22 – 7 degrees
Back Focal Length (mm)	6.64 - 9.4mm
Dimensions (diameter x Length xWidth)mm	38 x 51.5 x 45.6mm
Auto Iris Operation	DC
Weight (g)	99.1g
