

## App control & SMS texts, with SIM

A single path GPRS IP communicator that enables remote control of the system through the HomeControl+ App or InSite UDL software. It also enables SMS notifications of events to be sent.

You can rest assured that you are purchasing one of the most reliable communicating products, as the multi-network DualCom WorldSIM offers the best guarantee of network coverage anywhere in the UK.

With the first year's data usage included, it's 12 months before you need to consider billing the end user for usage.

# DIGI-GPRS IP COMMUNICATOR

Partcode	DIGI-GPRS
<b>Compatibility</b>	
HomeControl+ App	✓
<b>Key Features</b>	
Formats	Contact ID IP, SIA3 IP, SMS, supports uploading / downloading
Voltage	+12VDC
Dimensions	110mm x 56mm x 10mm
Roaming capabilities	(SIM dependant)

## Benefits:

- Uses mobile phone networks, excluding the Three network. Requires no cable to the panel and does not need mounting near a phone line.
- Can send backup text messages (network and SIM card dependent).
- Can send push notifications directly to the user's mobile phone.
- Works on most major mobile phone networks excluding the Three network.
- Battery backup in the panel will ensure communication is maintained, even if there is a power cut.
- Fully secure IP connection.
- Compatible with InSite programming software.
